

K. Onishi & Co., Ltd.

K. Onishi & Co., Ltd.
(textile@onishi.com)

In early 1900s, our company's founder **Koji ONISHI** has started manufacturing, import and export business for various Textile Machineries here at Osaka. Since after its incorporation in **1916**, we have been in **Textile Machinery** business. Today, in 1998 we are still mainly with textile and its related industries.

With time we have increased our scope of working and now our offers a full range of engineering service for turn key projects

Osaka, Japan

<http://www.onishi2.com/>

K. Onishi & Co., Ltd.

K. Onishi & Co., Ltd. was established by a team of textile specialists to buy, sell and trade various textile machinery from all over the world since 1916 in Osaka, Japan. K. Onishi & Co., Ltd. provides

Fiber plant

Spinning plant

Weaving looms

Knitting Machines

Desizing, scouring and bleaching range

Mercerizing range

Weight reduction range

Continuous dyeing range

Printing machine

Washing range

Baking machine

Yarn dyeing machine

Sanforizing machine

Textile accessories

Spare parts

Densimeter

Erection, Commissioning and Training

The erection and commissioning of the machines and equipment are supervised by the experts from machine suppliers. Already at this stage, intensive training is provided to the technical staffs who will later on be responsible for the operation of the plant. After the test run under production conditions, the plant is handed over to the customer.

Technical Assistance

K. Onishi & Co., Ltd. provides our experts to assist customer at the start-up stage to ensure optimum production and machinery utilization.

Know How Transfer

K. Onishi & Co., Ltd. provides worldwide well-known textile plant to coordinate and advise the production know how.

K. Onishi & Co., Ltd.

K. Onishi & Co., Ltd. has started their business since its antecedents in 1916 to promote the sales of various textile machinery manufacturers mainly from UK to international markets.

K. Onishi & Co., Ltd. has developed a worldwide-operating Engineering Company and General Contractor for various textile and industrial projects in adscript fields.

Supply of Different Plants:

- Chemical Fibre Plant (POY, DTY)
- Spinning Plant (Ring, OE, Cotton, Blended, Wool)
- Weaving Plant (Shuttle, Rapier, Air/Water Jet)
- Dyeing and Finishing Plant (Continuous or Batch)
- Medical Textile Plant
- Sports Wear Plant
- Laboratory and Testing
- Non Woven Plant (sanitary napkins)
- Thermo Bonded Non Woven Plant
- Glass Fiber (insulation e-glass)
- Garmenting or Converting
- CAD/CAM related equipments
- Film/Paper related facility
- Other utility and civil works for textile industry
- Raw Material and Chemical supply

K. Onishi & Co., Ltd.

K. Onishi & Co., Ltd. has been successfully supplying completed turn-key projects in many Asian countries since its establishment. The followings are just a part of them.

Project	Details
Weaving and Dyeing	Nasatex project in Indonesia
Weaving and Dyeing	Ratchaburi Textile in Thailand
Complete Spinning Plant	PT Ankoh Surabaya in Indonesia
Spinning, Weaving and Dyeing	Fung Jiaw Textile in China
Polyester Processing	Hangzhou Li Hwa in China
Cotton Weaving Plant	OM Shanti Satins in India
Canvass Fabric Weaving	Marvel Weaves in India
Denim Fabric Weaving	Suryalakshmi Cotton Mills Ltd India
POY lines	Tuntex in Taiwan
Weaving Project	Misr El Kafr in Egypt
Polyester Dyeing and Weaving	Samsung Industry in Korea

K. Onishi & Co., Ltd.

To maintain highest standards of engineering and to keep up with latest developments of technologies and manufacturing know-how, the company is in frequent contact and collaboration with all leading manufacturers of machinery and equipment as well as major chemical companies.

As consultants furthermore we conduct feasibility studies, prepare detailed project specifications, investigate and advise on specific process engineering requirements.

K. Onishi & Co., Ltd. operates own offices in Japan and in major textile related countries all over the world.

Services

K. Onishi & Co., Ltd. offers a full range of engineering service for turn key projects, comprising of :

- Feasibility studies
- Project planning and specifications
- Basic layout of the plant
- Basic & Detailed Engineering
- Machinery balancing
- Procurement and delivery
- Erection, commissioning and training
- Technical assistance
- Know how transfer

❖❖❖ TECHNOLOGIES OF
21st CENTURY
For Textile Industry
